1. Welcome

Welcome to the Ambitious about Autism training platform. If you are here, you are taking a meaningful step towards deepening your understanding of autism and how to support the people in your care.

This platform has been designed with busy practitioners in mind. You can work through training at your own pace, return to lessons whenever you need a refresher, and access resources and workshops arranged by your organisation — all in one place.

This guide explains how to use each part of the platform. You do not need any technical knowledge to get started. Take your time, and go at the pace that suits you.

2. Getting Started

Your account

There are two ways to get an account:

1. **Created by your organisation's administrator.** You receive an email or a printable QR card with your credentials. If your admin set a temporary password, you will be asked to change it on your first sign-in.
2. **You register yourself.** Visit [/register](#), choose **I work for or study at an existing organisation**, fill in your name, email, and pick your role. You will then receive a welcome email with a link to choose a password and sign in — no password to make up at the registration form itself. The link expires in 24 hours.

If you have not received the welcome email after self-registering, check your spam folder first. If it still hasn't arrived, ask your organisation's administrator.

Logging in

Visit <https://asd-training-app-v2.vercel.app> and enter your email address. The login page detects how you should sign in based on your email:

Email and password (most common) Enter your password and click **Sign in**. If this is your first login after self-registration or an admin reset, you may be prompted to change your password.

Single Sign-On (SSO) If your organisation uses corporate SSO, a **Sign in with [your provider]** button appears after you type your email. Click it and you will be taken through your organisation's normal sign-in process.

Google or Microsoft If the charity has enabled Google or Microsoft sign-in, those buttons also appear inline. You can use them whether or not your organisation has its own SSO.

Forgotten your password?

Click **Forgot password** below the password field. Enter your email address and a password-reset link will be sent to your inbox. The link expires after one hour, so use it promptly. If you do not receive the email, check your spam folder and contact your admin if it still does not arrive.

Staying signed in

Your session lasts for 8 hours. After that you will be asked to sign in again. This is a security measure — particularly important on shared devices.

3. Your Dashboard

When you sign in, you land on your **Dashboard**. This is your home base for everything on the platform.

Announcements

If your organisation or the platform administrators have posted any notices — new training content, upcoming events, reminders — they appear at the top of your dashboard. These are tailored to your organisation, so they are worth checking regularly.

Your progress at a glance

The dashboard shows summary cards that give you a quick read on where you are:

Card	What it shows
Lessons completed	How many lessons you have finished across all your assigned training
Training progress	A breakdown of progress per training programme, with links to continue

Training progress panel

Below the summary cards, a more detailed panel shows each training programme assigned to you — for example "ASD Awareness Training" — with a progress bar and a button to continue or start each one.

Upcoming Sessions card

If your organisation has any workshops or virtual sessions scheduled that you have been invited to, an **Upcoming Sessions** card will appear here showing the next session's title, date, and time.

4. Training Modules

The training content on this platform is organised into **programmes**, each made up of **modules**, which in turn contain **lessons**. Your organisation decides which programmes you are enrolled on.

Finding your training

Your assigned training programmes are listed in the left-hand sidebar, for example "ASD Awareness Training". Click a programme name to open it.

How programmes and modules work

Inside a programme, you will see a list of modules. Each module card shows:

- The module title and a short description
- How many lessons it contains and how many you have completed
- A **Start** or **Continue** button

You can access any lesson in any order — there is no requirement to unlock modules in sequence. If you want to revisit an earlier lesson or jump to a topic you need right now, you can do that freely.

Working through a lesson

Click a module card to see its lessons, then click any lesson to open it. Lessons come in three types:

- **Text lessons** — structured reading with written content, interactive elements, and a quiz at the end.
- **Video lessons** — an embedded video with a transcript you can read alongside it, plus a quiz.
- **SCORM lessons** — packaged interactive content from specialist publishers, which plays directly in the browser.

Progress tracking

Your progress is saved automatically as you complete lessons. If you close the browser mid-lesson, any lessons you have already finished will still be marked as complete. You can pick up where you left off at any time.

5. Lesson Features

Each lesson includes several features designed to make the learning experience accessible and engaging.

Text-to-Speech (TTS)

A **Play** button appears on each lesson so you can listen to the lesson content read aloud. The voice is a British female voice called Lily. This is useful if you prefer to listen while doing something else, or if reading from a screen is tiring.

For lessons with interactive carousels, each slide has its own play button so you can listen slide by slide.

For text-only lessons, the play button appears at the bottom of the page.

Interactive elements

Some lessons include interactive blocks embedded in the content:

- **Carousels** — swipeable or clickable slides, each with optional audio playback.
- **Hotspot images** — images with highlighted areas you can click to reveal more information.
- **Video embeds** — short clips embedded within the lesson text, separate from the main lesson video.
- **Rich text blocks** — formatted text, images, and other content woven throughout the lesson.

Quiz questions

Most lessons end with a short quiz to check your understanding. Work through each question and submit your answers. There is no pass or fail threshold — the quiz is there to reinforce the learning, not to assess you.

Certificate of Completion

After you complete a lesson (including the quiz, if there is one), a **Certificate of Completion** screen is displayed with the Ambitious about Autism logo. This confirms the lesson is marked as done on your record.

Resources

Some lessons have downloadable resources attached — for example, PDF reference sheets or supporting documents. If a lesson has any, they appear in a **Resources** section below the lesson content as download links. Click the file name to download it.

6. Document Library

Your organisation may have a document library set up for you. This is a collection of documents — guides, policies, reference materials — that your organisation wants to make available to practitioners.

Accessing the library

If collections have been shared with your role, they appear as individual links in the left-hand sidebar. You can also browse all collections you have access to by visiting [/library](#) directly.

Viewing and downloading documents

Click a collection to open it and see the documents inside. Click any document to view it or download it. Your organisation's administrators can see how documents are being accessed, so they can ensure the most useful materials are always available.

7. Workshops and Sessions

Your organisation may invite you to virtual workshops or training sessions, run over Zoom, Microsoft Teams, or another platform.

Upcoming sessions on your dashboard

When you have been invited to a session, an **Upcoming Sessions** card appears on your dashboard with the title, date, and time of the next one.

Viewing all your sessions

Click **Workshops** in the left-hand sidebar to see the full list of sessions you have been invited to, along with their status:

Status	Meaning
Scheduled	The session is coming up — check the date and time
In Progress	The session is live right now
Completed	The session has finished
Cancelled	The session was cancelled by the organiser

Joining a session

When a session is live, a **Join** button appears next to it. Click it to open the meeting link and join directly.

Recordings

After a completed session, the host or organiser may add a recording link. If one is available, a **Watch recording** link will appear on the session in your list. Click it to watch back at a time that suits you.

If you are a session host

If your organisation's administrator has assigned you as a **host** for a session, you will see extra options when you open that session:

- **Add or update the meeting link** — paste the Zoom or Teams link that attendees will use to join.
- **Mark attendance** — check off which attendees were present once the session is underway or finished.
- **Add a recording URL** — paste a link to the recording after the session ends.

8. Settings

The **Settings** option is at the bottom of the left-hand sidebar, above Sign Out.

Changing your password

Go to **Settings** to change your password at any time. You will need to enter your current password before setting a new one. Choose something secure that you will remember.

If you are prompted to change your password immediately after logging in, this means your administrator set a temporary password for you. You must change it before you can access the rest of the platform.

Multi-Factor Authentication (MFA)

MFA is not required for the Practitioner role. However, if your organisation's administrator has set up additional security requirements, you may be prompted to set up an authenticator app (TOTP). If this

happens, the platform will guide you through the steps — you will need an authenticator app such as Google Authenticator or Microsoft Authenticator on your phone.

Dark mode

The platform fully supports dark mode. All buttons, text, and interface elements remain clearly readable in both light and dark themes. Dark mode follows your device or browser's system preference automatically — there is no manual toggle needed.

9. Getting Help

If something is not working

Try these steps first:

1. **Refresh the page** — most loading issues resolve with a simple refresh.
2. **Sign out and sign back in** — if pages are not loading correctly, this resets your session.
3. **Check your internet connection** — the platform requires an active internet connection throughout your session.
4. **Try a different browser** — the platform works best on up-to-date versions of Chrome, Firefox, Edge, or Safari.

If you cannot log in

- Check that you are using the email address your administrator registered for you.
- Use the **Forgot password** link to reset your password if needed.
- If you are trying to use Single Sign-On and it is not working, contact your organisation administrator — they will need to confirm your account is set up correctly.

If you have a question about the training content

The training content is reviewed by specialists. If something in a lesson seems unclear, note your question and raise it with your line manager or the professional you work alongside. They will be best placed to help you apply the learning in your specific context.

The built-in How to Guide

The platform has an in-built guide available at any time. Click **How to Guide** in the left-hand sidebar. This guide covers the same ground as this document and is always up to date.

Contacting your organisation administrator

For account issues — password resets, access problems, or questions about which training has been assigned to you — your first point of contact is your organisation's administrator, not the platform support team.

Guide version: May 2026. For the latest version of this guide, click How to Guide in the platform sidebar.

Careers Professional User Guide

Ambitious about Autism — CPD Training Platform *For Careers Leaders, SENCOs, and SEND Professionals*

Contents

1. [Welcome](#)
 2. [Getting Started](#)
 3. [Your Dashboard](#)
 4. [Careers Training](#)
 5. [Job Openings](#)
 6. [My Students](#)
 7. [Workshops and Sessions](#)
 8. [Settings](#)
 9. [Getting Help](#)
-

1. Welcome

Welcome to the Ambitious about Autism training platform. This guide is written for careers leaders, SENCOs, SEND co-ordinators, and anyone in a guidance or pastoral role who supports autistic young people into education, training, or employment.

As a **Careers Professional**, you have access to a range of tools designed to support both your own continuing professional development and the practical work you do with the young people in your care. Alongside structured CPD training modules, the platform provides curated job listings and student management tools — all in one place.

What this platform is not: The training content does not lead to a formal qualification or accreditation. It is a structured, evidence-informed CPD resource to support and document your professional learning, aligned with the Gatsby Benchmarks framework for careers education.

2. Getting Started

2.1 Your account

Self-registration is not available on this platform. Your account is created by your organisation's administrator, who will send you your login credentials directly. There is no "Sign up" or "Register" button on the platform.

If you have not received your credentials, contact your organisation administrator or the person who arranged your platform access.

2.2 Signing in

Navigate to the platform at <https://asd-training-app-v2.vercel.app>.

The login page auto-detects the sign-in method from your email — no toggle to flip.

Email & Password Enter the email address and password provided by your administrator (or chosen via the welcome email if you self-registered), then select **Sign in**. You will be prompted to change your password on first sign-in if your administrator set a temporary one for you. If you forget your password at any time, select **Forgot password?** on the login page and a reset link will be sent to your email inbox.

Single Sign-On (corporate IdP) If your organisation has configured enterprise SSO, a **Sign in with [your organisation]** button appears once you type your email. Click it to sign in through your usual corporate identity provider.

Google or Microsoft If the charity has enabled Google or Microsoft sign-in, those buttons appear inline above the password form. If you sign in this way and don't have an account yet, you will be taken to a brief one-question registration page to finish setting up. No "access denied" — first-time OAuth users can self-register.

Self-registering as a Careers Professional If your organisation already exists on the platform but you don't have an account, you can register yourself at [/register](#). Choose **I work for or study at an existing organisation**, find your organisation in the list, and select the **Careers Professional** role. You will receive a welcome email with a link to set your password.

2.3 Multi-factor authentication (MFA)

MFA is not mandatory for the Careers Professional role. You will not be required to configure a TOTP authenticator app.

2.4 Your sidebar

Once signed in, the sidebar on the left provides your main navigation. The links you see depend on the training programmes and document collections your organisation has enabled. A typical sidebar for a Careers Professional looks like this:

Link	Where it goes
Dashboard	Your home screen
[Training programme name(s)]	Your assigned training programmes (e.g. Careers CPD Training)
[Document collection links]	Any document collections shared with your role
How to Guide	This guide, accessible in-platform
Jobs	Curated job listings for students
My Students	Manage your students and view their progress
Workshops	Upcoming and past virtual classroom sessions
Settings	Password and account settings (bottom of sidebar)
Sign out	Signs you out of the platform (bottom of sidebar)

If your organisation has granted you access to additional training programmes, each will appear as a separate link in the sidebar.

3. Your Dashboard

After signing in you are taken to your **Dashboard** at </dashboard>. This is your home screen and gives you a quick overview of your activity and upcoming commitments.

3.1 Training progress

The dashboard shows your completion across all assigned training programmes — total lessons completed out of the total available, and a per-programme progress card with a **Start** or **Continue** link.

3.2 Upcoming workshops

If you have been added as an attendee or host for an upcoming virtual classroom session, an **Upcoming Sessions** card will appear on your dashboard showing the next session's title, date, and time.

3.3 Announcements

If your organisation's administrator or the platform team has posted an announcement — such as information about new content, events, or policy updates — it will appear in a highlighted banner near the top of your dashboard. Announcements may have an expiry date and will disappear automatically once they are no longer active.

3.4 Feature tiles

Depending on your organisation's settings, you may see a quick-access tile for the Jobs feature.

4. Careers Training

Select the training programme link in the sidebar to reach the training hub for that programme.

4.1 Overview page

At the top of the training hub you will see a progress card showing your overall completion — total lessons completed, total available, and an overall percentage. Below this are cards for each module within the programme.

4.2 Working through a module

Select **Start module** or **Continue** on a module card to open it. Locked modules show a padlock icon — they will unlock once the preceding module is fully complete.

On the **module overview page** you will see:

- The module description and your current progress bar.
- A **Start first lesson** or **Continue learning** button that takes you straight to your next incomplete lesson.
- A full list of all lessons in the module, each showing its type (text, video, or SCORM) and the number of quiz questions it contains. Completed lessons are marked with a green tick. Within a module, lessons are completed in sequence — a lesson unlocks only after the previous one is finished.

4.3 Lesson features

Each lesson page may include a combination of the following:

Text-to-speech (TTS) A play button above the lesson title reads the lesson content aloud using a clear British female voice. For lessons with carousel blocks, each slide has its own TTS play button. For prose-only lessons, a player also appears at the bottom of the page. MP3s are pre-generated so playback starts immediately.

Interactive blocks Lessons may include:

- *Carousels* — slide-by-slide content with per-slide TTS
- *Hotspot images* — click on areas of an image to reveal more information
- *Video embeds* — embedded videos within the lesson flow
- *Rich-text sections* — formatted prose with headings, lists, and images

Quiz Most lessons end with a knowledge check quiz. Answers are multiple-choice. After submitting each answer you receive immediate feedback and a brief explanation. You must complete all quiz questions to mark the lesson as finished.

Certificate of Completion When you finish a lesson, a Certificate of Completion is displayed featuring the Ambitious about Autism logo. This can be printed or saved as evidence of CPD.

4.4 Progress saving

Progress is saved automatically when you complete a quiz. If you close the browser or navigate away before finishing the quiz, the lesson will not be marked as complete and you can return to it at any time. Completed lessons remain complete permanently.

4.5 Reviewing completed lessons

Completed lessons remain fully accessible. On the module overview page, select **Review** next to any completed lesson to re-read its content at any time.

5. Job Openings

The Jobs feature surfaces charity-curated job opportunities to students, interns, and employees. Select **Jobs** in the sidebar to reach it at </jobs>.

5.1 Browsing job listings

The Jobs page shows all published job openings that are targeted to your organisation or role. Each listing shows:

- Employer name and details

- Job title and description
- Employment type: Internship, Apprenticeship, Part-time, Full-time, or Volunteer
- Location type: On-site, Hybrid, or Remote
- Closing date
- Autism-friendly notes (where provided by the employer)

Select a listing to open the full job detail view.

5.2 Job assignments

The charity admin can assign specific job listings to individual students via your CDO account. If a job has been assigned to a particular student, it will appear in that student's job list. This is managed by the charity team — if you need a specific job highlighted for a student, contact your platform administrator.

6. My Students

The **My Students** section lets you manage the STUDENT, INTERN, and EMPLOYEE users within your organisation. Select **My Students** in the sidebar.

6.1 Your student list

You will see a list of all students, interns, and employees in your organisation. From here you can:

- View each student's profile and contact details.
- See their training progress across assigned programmes.

6.2 Training progress

Select a student's name to open their profile. Their training progress shows completion per programme and per lesson, so you can identify who may need a nudge or additional support.

7. Workshops and Sessions

Your organisation can run live virtual classroom sessions over Zoom, Microsoft Teams, or a custom link. Select **Workshops** in the sidebar to view your sessions at [/sessions](#).

7.1 Viewing your sessions

The Sessions page shows all sessions you have been invited to, with their status: Upcoming, In Progress, Completed, or Cancelled.

7.2 Joining a session

When a session is ready, a **Join** button will appear. Selecting it opens the meeting link in a new tab.

7.3 Upcoming sessions on the dashboard

When you have an upcoming session, a card will appear on your Dashboard showing the title, date, and time at a glance.

7.4 Recordings

After a session has taken place, your organisation's admin may add a recording link. If one is available, a **Watch recording** link will appear on that session.

7.5 Hosting a session

If your administrator has assigned you as the **host** of a session, you will have additional options on that session's page:

- **Meeting link** — add or update the link that attendees will use to join.
- **Attendance** — mark which attendees were present during or after the session.
- **Recording** — add a recording URL after the session ends so attendees can watch it back.

8. Settings

Select **Settings** at the bottom of the sidebar to reach your account settings at </settings>.

8.1 Changing your password

The Settings page lets you change your password at any time. Enter your current password and your new password, then confirm. Passwords must be at least 8 characters.

8.2 Dark mode

The platform follows your system preference for dark mode automatically. All interface elements — including role badges, progress indicators, and form controls — are clearly readable in both light and dark themes.

9. Getting Help

How to Guide An in-platform guide is available at </guide>. Select **How to Guide** in the sidebar to access it at any time.

Technical issues If you experience login problems, pages not loading, or progress not saving, contact your organisation administrator in the first instance. For platform-wide technical issues, email support@ambitiousaboutautism.org.uk with a description of the issue and the browser you are using.

Content queries For questions about module content or the Gatsby Benchmarks framework, speak to your line manager or SEND lead, or refer to the [Gatsby Foundation careers guidance resources](#).

Account administration For role changes, adding colleagues, or organisational access queries, contact your organisation's platform administrator. Administrators manage user accounts through the admin panel and can create new accounts, reset passwords, and adjust access.

Privacy and data requests Under UK GDPR you have the right to access, correct, and request erasure of your personal data. To make a request, email privacy@ambitiousaboutautism.org.uk with your name and the nature of your request.

Ambitious about Autism — Registered Charity This platform is a professional development resource and does not constitute a diagnostic tool.
