

AAA Digital Platform — Training Materials

Version 2.0 · 11 May 2026 · Internal use only

Onboarding materials, quick-reference cards, FAQs, and a glossary covering every user role on the AAA Digital Platform.

Changes since v1.0: Updated the "Can users self-register?" FAQ (self-registration is now enabled — see the [Self-Registration Flow](#) document). Added a Charity Employee onboarding checklist. Added FAQ entries on cohorts and brand assets.

Platform Overview

What is the AAA Digital Platform?

A training platform for Ambitious about Autism. It delivers structured training programmes to the charity's own staff and to external organisations — schools, colleges, universities and employers — alongside virtual workshops, a document library and a job board.

Who uses it?

There are four roles.

- **Learners** (**LEARNER**) — anyone who takes training, whether charity staff or a member of an external organisation. Training, jobs, workshops and the document library.
- **Organisation Admins** (**ORG_ADMIN**) — manage their own organisation's users, workshops, job openings, library and reports
- **Charity Staff** (**CHARITY_EMPLOYEE**) — delegated charity-level access, permissions configurable per user
- **Charity Admins** (**SUPER_ADMIN**) — full platform access

What a learner sees is set by their organisation, not their role. Access comes from the training programmes an organisation has been assigned, so two learners in different organisations can see entirely different content. Internal versus external is a property of the organisation too: the charity has its own organisation record, and its staff are ordinary members of it.

Training programmes

ASD Awareness Training · Careers CPD Training · Autism in the Workplace · custom SCORM packages uploaded by the charity. Progress is tracked automatically and completion earns a certificate.

Job openings

Two tiers, both shown in one list to the learner. The charity publishes curated opportunities platform-wide; an organisation can publish its own, visible only to its members and to any child organisations beneath it. Listings carry autism-friendly notes describing what makes the role and workplace suitable, and close automatically once the closing date passes.

Admin features

User management · Organisation hierarchy · Cohort management (with optional Eventbrite import) · Brand asset store · Document library · Surveys with AI insights · Workshops & sessions · Job board · Announcements · Reports & CSV export · Enterprise SAML SSO · AI Prompt registry · Integration API keys.

Technology

Built on Next.js 14, hosted on Vercel, database on Neon PostgreSQL. AI via the Vercel AI Gateway (Gemini / Claude / GPT). Text-to-speech via ElevenLabs (Lily voice). Email via Resend.

Onboarding Checklists by Role

Learner (**LEARNER**)

- ☐ Receive a welcome email from the platform, or be invited by an Organisation Admin
- ☐ Click the welcome link and pick a password on **/welcome**
- ☐ Land on the dashboard — review assigned training and announcements
- ☐ Start the first training module from the sidebar
- ☐ Complete all lessons and quizzes to earn a certificate
- ☐ Browse the Jobs board for opportunities
- ☐ Check the Workshops section for upcoming sessions
- ☐ Update display name in Settings → Account

Organisation Admin (**ORG_ADMIN**)

- ☐ Sign in and **complete MFA setup** — mandatory for admin roles
- ☐ Review organisation settings (allowed programmes, allowed roles, feature flags)
- ☐ Invite the first colleagues with appropriate roles
- ☐ Create a test announcement to verify it appears on dashboards
- ☐ Create a workshop session and invite attendees
- ☐ Review the Reports page to understand available data
- ☐ Configure Zoom or Teams API in Meeting Settings if you want auto-generated meeting links
- ☐ Review Document Library collections shared with your org
- ☐ Configure SAML SSO at Enterprise SSO if your org uses an IdP

Charity Employee (**CHARITY_EMPLOYEE**)

A delegated charity-level role with configurable permissions. Sidebar items appear based on which permissions a Charity Admin has granted you.

- ☐ Sign in and **complete MFA setup**
- ☐ Confirm your **charityPermissions** with the Charity Admin who created your account
- ☐ Walk through each section your sidebar shows
- ☐ Read the Charity Admin Guide sections for the permissions you've been granted

Charity Admin (**SUPER_ADMIN**)

- ☐ Sign in and **complete MFA setup**
- ☐ Review the Overview dashboard
- ☐ Create the first real organisation
- ☐ Invite that org's first administrator
- ☐ Review and publish training content
- ☐ Set up the AI Prompt registry — review the tone & model for each prompt
- ☐ Upload initial brand assets (logos, banners) for the AI banner generator
- ☐ Create a charity-level cohort if running open workshops
- ☐ Set up the Integration API key for Power Automate / external reporting if needed
- ☐ Configure OAuth SSO toggles if Google / Microsoft credentials are present

- ☐ Test the full user journey end-to-end: self-register a test learner → complete a lesson → view the report

General FAQs

Q: How do I log in? A: Go to the platform URL, type your email, and the page shows the right sign-in method (password, SSO button, or both) automatically. There's no manual toggle.

Q: I forgot my password — what do I do? A: Click *Forgot password?* on the login page and enter your email. You'll receive a reset link valid for 1 hour.

Q: I never set a password — I got a welcome email but lost it. A: Ask your Org Admin to resend it, or use the *Forgot password?* link with the email you registered.

Q: Why can't I see some menu items? A: Menu items depend on your role and, for learners, on which training programmes your organisation has been assigned. Contact your admin if you believe something is missing.

Q: Is my data secure? A: Yes. Passwords are bcrypt-hashed at cost 12. Sessions use signed JWT tokens with an 8-hour TTL. MFA is mandatory for admin roles. All traffic is over HTTPS. The platform is hosted on Vercel with Neon's SOC 2 compliant database. Sub-processor list and DPA status are published at </privacy>.

Learner FAQs

Q: How do I unlock the next module? A: Complete all lessons in the current module. The next module is then unlocked automatically.

Q: Can I retake a quiz? A: Yes — you can retry immediately after a failed attempt.

Q: How do I get my certificate? A: Your Certificate of Completion appears automatically after you finish the final lesson in a module.

Q: What is the TTS play button? A: TTS (Text-to-Speech) reads lesson content aloud using the Lily voice from ElevenLabs. Click the play button at the top of any text lesson.

Q: Can I add personal notes to a lesson? A: Yes — every lesson has a notes field. Notes are private to you.

Q: Where do the job listings come from? A: Two places, shown together in one list. Ambitious about Autism publishes curated opportunities platform-wide, and your own organisation can publish its own. A job may also be assigned to you individually, in which case it appears even if it was not otherwise aimed at your organisation.

Q: What are the autism-friendly notes on a job? A: A description from the employer of what makes the role and workplace suitable — predictable hours, quiet spaces, a named contact, an adjusted interview process, and so on. Not every listing has them.

Q: A job disappeared from my list. Why? A: Listings close automatically once their closing date passes. If it was assigned to you individually, you can still reach it from a direct link.

Organisation Admin FAQs

Q: Why is MFA mandatory for my account? A: Admin accounts have access to all user data in your organisation. MFA protects against unauthorised access if a password is compromised.

Q: How do I create a user's account? A: Go to Users → Add User. Enter their name, email, role, and a temporary password (or tick "SSO only" if your org uses Google / Microsoft / SAML). The user is prompted to change the password on first sign-in.

Q: Can users self-register without me inviting them? A: **Yes** — as of May 2026, self-registration is enabled. A user from your organisation can visit `/register`, select "I work for or study at an existing organisation", and find your org in the typeahead. They'll only see roles your org has approved (`allowedRoles`). They get a welcome email and choose their own password. You can deactivate them from the Users page if needed. To disable self-registration into your org, contact the Charity Admin.

Q: How do I configure automatic meeting links for workshops? A: Go to Settings → Meeting Settings and enter your Zoom or Microsoft Teams API credentials. The platform will generate meeting URLs automatically when you create a workshop.

Q: My organisation manages multiple schools — how does that work? A: If your org is flagged as a parent organisation (`isParentOrg`), a **Schools** link appears in your sidebar. From there you can create and manage child orgs. Child orgs with **Inherit Settings** on share your training programmes, allowed roles, and feature flags.

Charity Admin FAQs

Q: How do I enable Google / Microsoft sign-in? A: Two steps. (1) Set `GOOGLE_CLIENT_ID` / `AZURE_AD_CLIENT_ID` env vars in Vercel and redeploy. (2) Sign in as Charity Admin, go to Settings → SSO, and flip the matching toggle on. The toggle won't activate without the env vars (an amber warning appears).

Q: What's the difference between an Organisation and a Cohort? A: Both are rows in the `Organisation` table. **Organisations** are registered schools / employers with their own admin

and ongoing user accounts. **Cohorts** are lightweight groups for one-off events (a public workshop, an awareness session) — members are managed by the charity directly, with no organisation admin. Cohorts can also be imported from Eventbrite event attendee lists.

Q: How do brand assets get used? A: The Brand Store under Charity Admin holds AAA logos, banners, and illustrations. The AI banner generator and AI library-thumbnail features use them as context so the output stays on-brand. You can tick "Use brand store as context" on the banner-generation modal.

Q: How do I extract reporting data into our internal system (e.g. Dynamics 365)? A: Create an Integration API key at `/super-admin/integrations`, then call `/api/integrations/reports?section=training|library|surveys` with a Bearer token. The raw key is shown only once on creation — store it safely.

Quick Reference Cards

Learner — key URLs

`/dashboard` · `/training` · `/sessions` · `/settings` · `/cv-builder` · `/careers-advisor` · `/jobs` · `/library`

Admin — key URLs

`/admin` (Org Admin) · `/super-admin` (Charity Admin) · `/admin/users` · `/admin/sessions` · `/admin/reports` · `/admin/library` · `/admin/settings/sso` · `/admin/settings/meetings` · `/super-admin/cohorts` · `/super-admin/integrations` · `/super-admin/ai-prompts`

Roles at a glance

- `SUPER_ADMIN` = Charity Admin
- `CHARITY_EMPLOYEE` = Charity Staff (configurable permissions)
- `ORG_ADMIN` = Organisation Admin
- `LEARNER` = Learner (everyone who takes training, internal or external)

Support contacts

- **Login or password reset:** Org Admin (or Forgot Password link)
- **Missing menu item or feature:** Org Admin (they control your role + org settings)
- **Platform-wide issue:** Charity Admin
- **Technical issue or bug:** Charity Admin (escalates to development team)
- **Training content question:** Charity Admin
- **SSO configuration:** Charity Admin or charity IT team

Glossary

Term	Definition
AAA Digital Platform	The Ambitious about Autism training and career-development platform
LEARNER	The single role for everyone who takes training. What they can see comes from their organisation's assigned programmes
Cohort	A lightweight group for charity-run events (organisation row with <code>orgType = COHORT</code>)
MFA	Multi-Factor Authentication — a second login step using an authenticator app
TOTP	Time-based One-Time Password — the 6-digit code generated by authenticator apps
SCORM	Sharable Content Object Reference Model — a standard for packaged e-learning content
TTS	Text-to-Speech — reads lesson content aloud using ElevenLabs (Lily voice)
SSO	Single Sign-On — log in using an existing Google, Microsoft, or SAML-federated account
SAML	Security Assertion Markup Language — enterprise SSO standard
Magic link	The 24h tokenised welcome email used by self-registration
Brand asset	Logo, banner, illustration uploaded by the charity for AI context
Neon	Cloud PostgreSQL database hosting the platform data
Vercel	Cloud platform where the app is deployed
Prisma	ORM (Object Relational Mapper) used to query the database
NextAuth	Authentication library managing login sessions

Vercel Blob	Cloud file storage for documents, images, SCORM packages, TTS audio cache
AI Gateway	Vercel AI Gateway — routes AI requests to Gemini / Claude / GPT with multi-provider fallback
Resend	Transactional email provider used for welcome links, password resets, scheduled reports

Help & Support

Tip: Most admin pages include a "How to use this page" expandable section. Click it for in-app guidance specific to that page.

Need help with	Who to contact	How
Login or password reset	Org Admin	Direct contact or Forgot Password link
Missing menu item or feature	Org Admin	They control your role and org settings
Platform-wide issue	Charity Admin (SUPER_ADMIN)	Contact the Ambitious about Autism team
Technical issue or bug	Developer / Charity Admin	Report via GitHub issues or direct contact
Training content question	Charity Admin	They manage all training content
SSO configuration	Charity Admin or IT team	Requires Azure AD / Google Cloud / SAML IdP access
Cohort import / Eventbrite	Charity Admin	Permission MANAGE_COHORTS required
Brand asset upload	Charity Admin	Permission MANAGE_LIBRARY or MANAGE_TRAINING required
